

NORFLOW-WIN[®]

Chemical Pumping System

The **NORFLOW-WIN[®]** system designed and manufactured by Norchem is a fully automated chemical handling equipment that can be used in any laundry business. Our pumping systems are packaged in a way that only utilizes the best technology and can be equipped with all electric self priming positive displacement pumps and all stainless steel chemical valves and chemical delivery line. If you want the best quality pumping systems then **NORFLOW-WIN** is the only one that delivers the fully automated packaged system you require.

A rugged stainless steel chemical injection system, **NORFLOW-WIN** features the most reliable and technologically advanced chemical delivery for both conventional and tunnel washers. **NORFLOW-WIN** delivers the precise amount of chemicals, provides proof of delivery, lowers product waste, and delivers consistency wash quality. **NORFLOW-WIN** also features the latest software and hardware for real-time display of the entire washroom and chemical injection operation, and the ability to generate accurate and custom reports such as chemical inventories, washroom production, chemical costs, down-time and more.

- Eliminates peristaltic and diaphragm pumps
- Chemical suction and discharge lines are hard pipe
- Minimizes possibility of chemical leak
- Injects chemicals by volume or time
- Consistent and accurate chemical injection
- Eliminates the need for day tanks
- Robust touch screen PC and software
- Generate custom reports to meet your needs
- Connect remotely, via modem or internet

NORFLOW-WIN is available in two versions: **G3** for conventional washers, and **G4** for tunnel washers.
